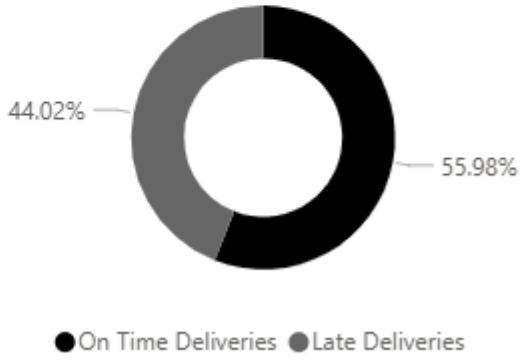
Delivery Distribution

by Orders



Page 1: Overview (Q/A)

Q1: How is overall business performance?

Answer:

Total Sales is ₹111.7M with strong YoY growth (~98%), and Profit is ₹42.25M with similar growth. Order volume also increased significantly, indicating strong business expansion.

Q2: Is growth consistent or fluctuating?

Answer:

Monthly sales trend shows some fluctuations, but overall performance remains stable with a peak around mid-year. Compared to last year, current performance is consistently higher.

Q3: Which categories drive the most revenue?

Answer:

Lifestyle and Low-Top categories are top contributors to sales. These categories should be prioritized for inventory and marketing strategies.

Q4: Which cities are performing best?

Answer:

Bangalore is the top-performing city followed by Kolkata and Pune. This suggests strong regional demand concentration.

Q5: How is delivery performance overall?

Answer:

Around ~56% deliveries are on time, while ~44% are late. This indicates a significant opportunity for operational improvement.

Q6: Is OTIF meeting target?

Answer:

OTIF is ~51%, significantly below the 90% target, indicating major inefficiencies in delivery fulfillment.

Page 2: Operations (Q/A)

Q1: What is the current delivery efficiency?

Answer:

Average delivery time is 5 days, but average delay is 2.3 days for late orders, which shows inefficiency in certain deliveries.

Q2: What percentage of deliveries are problematic?

Answer:

Around 40% of deliveries are late, which is quite high and directly impacts customer satisfaction and OTIF performance.

Q3: Where are delays happening the most?

Answer:

Bangalore has the highest number of delayed deliveries, indicating possible logistics or demand pressure issues in that region.

Q4: Which categories cause most delays?

Answer:

Lifestyle and Performance Low categories show the highest delay counts, suggesting supply chain or demand mismatch issues.

Q5: How do delivery trends change over time?

Answer:

Delivery trend shows that late deliveries are consistently present across months, indicating a systemic issue rather than a seasonal one.

Q6: What is the order outcome distribution?

Answer:

Majority orders are completed (~80%), with smaller portions returned and cancelled, which is acceptable but still has room for improvement.

Q7: What is the biggest operational risk?

Answer:

High late delivery percentage combined with low OTIF is the biggest risk, as it directly impacts customer experience and retention.

Page 3: Finance (Q/A)

Q1: Is the business profitable?

Answer:

Yes, the business is profitable with ₹42.25M profit and a healthy margin of ~37.8%.

Q2: Is profit margin meeting expectations?

Answer:

Profit margin is above the target (35%), showing strong cost control and pricing strategy.

Q3: What is the average order value?

Answer:

AOV is ~₹13.96K, which is above the target (₹12K), indicating strong revenue per transaction.

Q4: Is return rate a concern?

Answer:

Yes, return rate is ~10%, exceeding the target (<5%), which can negatively impact profitability.

Q5: Which categories are most profitable?

Answer:

Streetwear and Performance Low categories have the highest profit margins, making them key revenue drivers.

Q6: Which products generate the most profit?

Answer:

Top models like Aeon and APEX contribute the highest profit, indicating strong product-market fit.

Q7: What is revenue distribution by customer type?

Answer:

Around 60% revenue comes from non-members, while 40% comes from members, indicating an opportunity to grow membership programs.
